

Marine Towing, Tug and Barge Insurance

Sloan Mason Insurance Services offers an integrated approach to risk management and transfer for marine towing, tug and barge accounts. Each client has a team of skilled professionals providing customer-focused underwriting, loss control and claims needs along with account relationship managers who facilitate communications on all aspects of the account.

Coverages

We provide Hull, Protection & Indemnity, Comprehensive Marine Liability, Bumpershoot and Pollution Coverages for numerous maritime companies.

Loss Control

Loss control personnel who specialize in the maritime industry examine issues that impact safety –including management practices, operational hazards and regulatory compliance. This allows the underwriting team to customize strategies to reduce and eliminate costly risks and enhance safety.

Claims Specialists

Each insured benefits from a claims liaison who serves as a central point of contact for client, broker, claims, underwriting and loss control teams. This approach expedites management of claims issues and mitigates losses by helping our clients to prevent smaller claims from escalating. Efficient and effective resolution is at the heart of Sloan Mason's integrated approach to claims. Once a claim is reported, this approach brings to bear high quality investigative, legal, medical and accounting expertise early in the claims process when it can have the greatest impact for our insureds.

Strong Coverages, Flexible Structures

In addition to the coverages shown above, Sloan Mason offers flexibility in structuring Workers Compensation and Employers Liability, Maritime Employers Liability, Commercial Auto Liability and Physical Damage for Insureds in the maritime arena.

Options Include:

Guaranteed Cost

Self-Insured Retentions
