TRACT HOUSING INFRASTRUCTURE SUPPLEMENTAL QUESTIONNAIRE**

The information provided below should only reflect work related to new tract housing construction, including infrastructure and common areas, whether performed for a developer, utility, municipality, or other entity. Tract is defined as any development or project of more than 10 homes or lots, including all phases.

Any policy issued by Navigators California Insurance Services will exclude OCIP work, including "off-premises" work for OCIP projects. Do not include OCIP work in your responses to the questions below.

1. Named Insured : _____
2. What percentage of your work is for new tract projects: _____%
3. How many new tract housing projects have you worked on in the past 10 years?

4. How many new tract housing projects do you expect to work on in the upcoming year? _____
5. Describe the geographic area in which you perform tract housing work

6. List the largest tract projects currently in progress or planned for the next year:

# Homes	City	Project Name
_____	_____	_____
_____	_____	_____
_____	_____	_____

7. List the largest tract projects you have completed in the past 10 years:

Year	#Homes	City	Project Name
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____
_____	_____	_____	_____

8. On any prior or planned new tract projects, have you performed, or will you perform, any work related to:
- a) construction of homes?
 - b) construction of home pads or foundations?
 - c) construction of patios, driveways, or landscaping within individual home lot lines?
 - d) connection of utilities to homes?
 - e) grading of land intended to be used as home pads?
 - f) work related to drainage, soil stabilization, or erosion control?
 - g) retaining wall construction, or "cut and fill" work?
 - h) work on slopes over 20 degrees?
